

# THE BREACH

**AN IMMERSIVE WHODUNNIT EXPERIENCE**  
**5 PLAYERS • 30 MINUTES**

A ransomware attack has locked down High Tech Inc's systems and the hackers are playing games. Literally.

They claim they only needed one set of stolen credentials to get in. Now they've handed you five suspects, five methods of compromise, and five locations.

Crack the case and they'll hand over the decryption key. Get it wrong? Game over.

You'll analyse IT logs, phone records, internal emails, digital footprints and dodgy clues left behind a cunning attacker.

You'll get physical kit, CCTV images, social media profiles, interactive phone calls, and some truly questionable password practices.

## DIVE IN TO THE EXPERIENCE

### WATCH THE VIDEO

A quick look at how The Breach works - from the clues to the chaos. See it in action now.

### CALL THE HACKER

Want a preview? Call Viper from The Breach Collective to hear her for yourself. Be careful though... she might bite.

**07380 307304**

## LEARNING OUTCOMES

#### **Social Engineering**

Spot vishing attack techniques, and hear them in action

#### **Social Media Privacy**

Understand how oversharing online hands attackers everything they need

#### **Role-Based Attacks**

See how attackers might target specific roles and understand your threat profile

#### **Everyone's Responsible**

Recognise that security isn't just IT's job, it's for everyone to consider.
