LARGE-SCALE IMMERSIVE INSTALLATIONS

For unforgettable cyber security experiences

SPACE_

WE BUILD WORLDS, NOT WORKSHOPS.

SPACE_ is our collection of large-format, theatrical cyber experiences designed to transform conferences, expos, and corporate events into unforgettable stories.

Let's build something unforgettable.

SPACE_ WORKS AT:

- _ Conferences
- _ Expo Activations
- _ Leadership Off-sites
- _ Internal Culture Campaigns

An architectural sketch of a room, possibly a cyber escape room, with dimensions and a central structure. The sketch is rendered in white lines on a dark background. Dimensions are marked: 400, 200, 1300, and 1700. A central structure, possibly a desk or a piece of equipment, is shown with a grid-like pattern. The word "INSTALLATIONS" is written in large, bold, white capital letters across the center of the image. A yellow horizontal bar is located to the right of the word "INSTALLATIONS".

INSTALLATIONS

INSTALLATION

THE VAULT

_PLAYERS: 20 **_SPACE:** 8M X 8M **_TIME:** 30 - 60 MINUTES

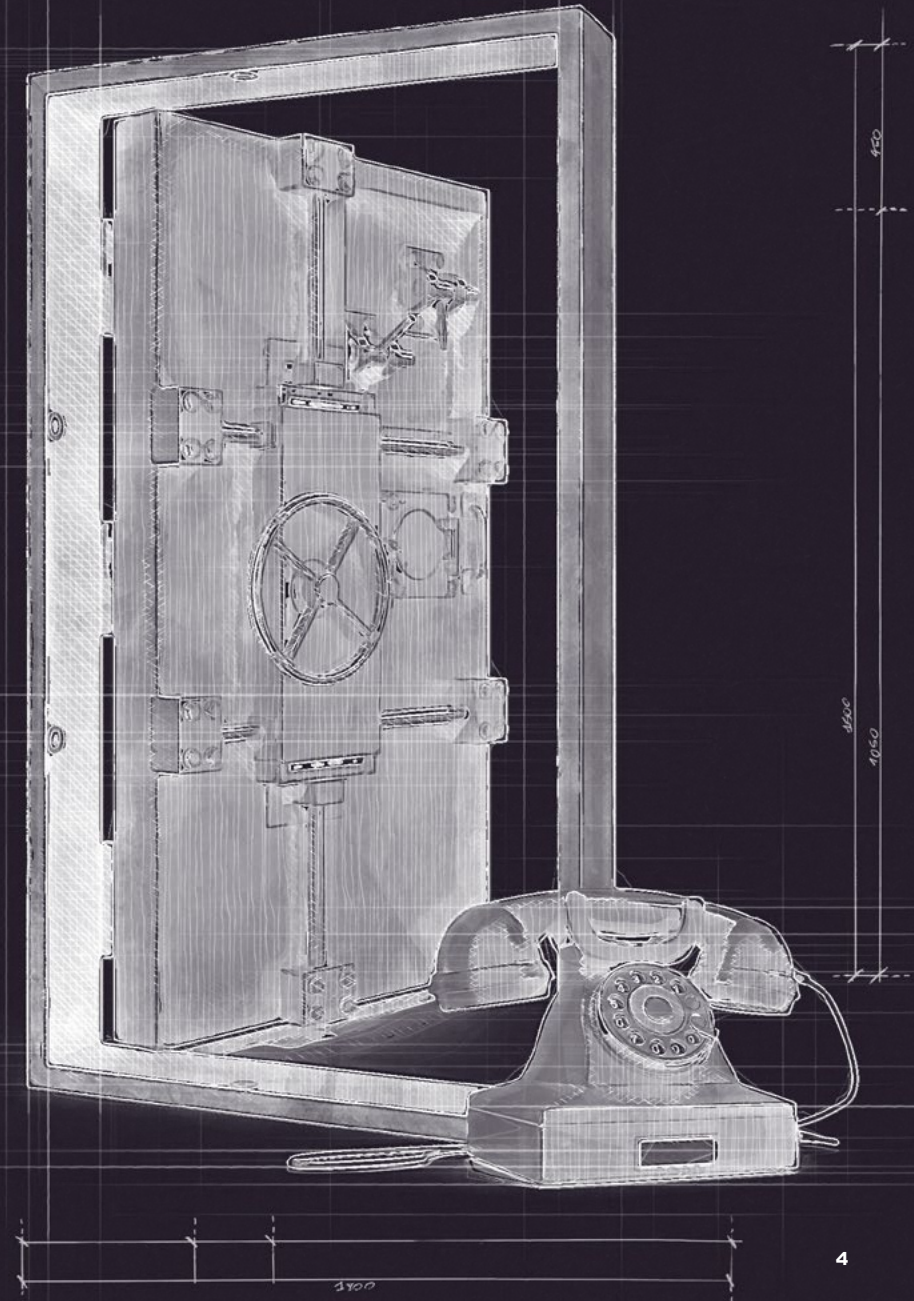

A high-stakes break-in where the objective is entirely yours to define.

Whether your vault holds a secret recipe, sensitive data, a fortune in cash, or something far more dangerous... this installation lets you craft the narrative (and the prize) exactly as you want it. The theming is fully adaptable, from corporate storyline to cinematic mission.

Designed for competitive, high-energy play, four teams enter simultaneously, working in parallel to breach the vault. Sessions can run collaboratively or head-to-head, depending on the style of experience you want to deliver.

Tailored to your event schedule and ambitions, every element can be reskinned, rewritten, and reimaged, making The Vault one of our most versatile environments for client-specific storytelling.

A blank canvas for chaos, strategy, and tension – completely bespoke, every time.

INSTALLATION

FINAL STOP

_PLAYERS: 36 _SPACE: 12M X 3.5M _TIME: 55 MINUTES

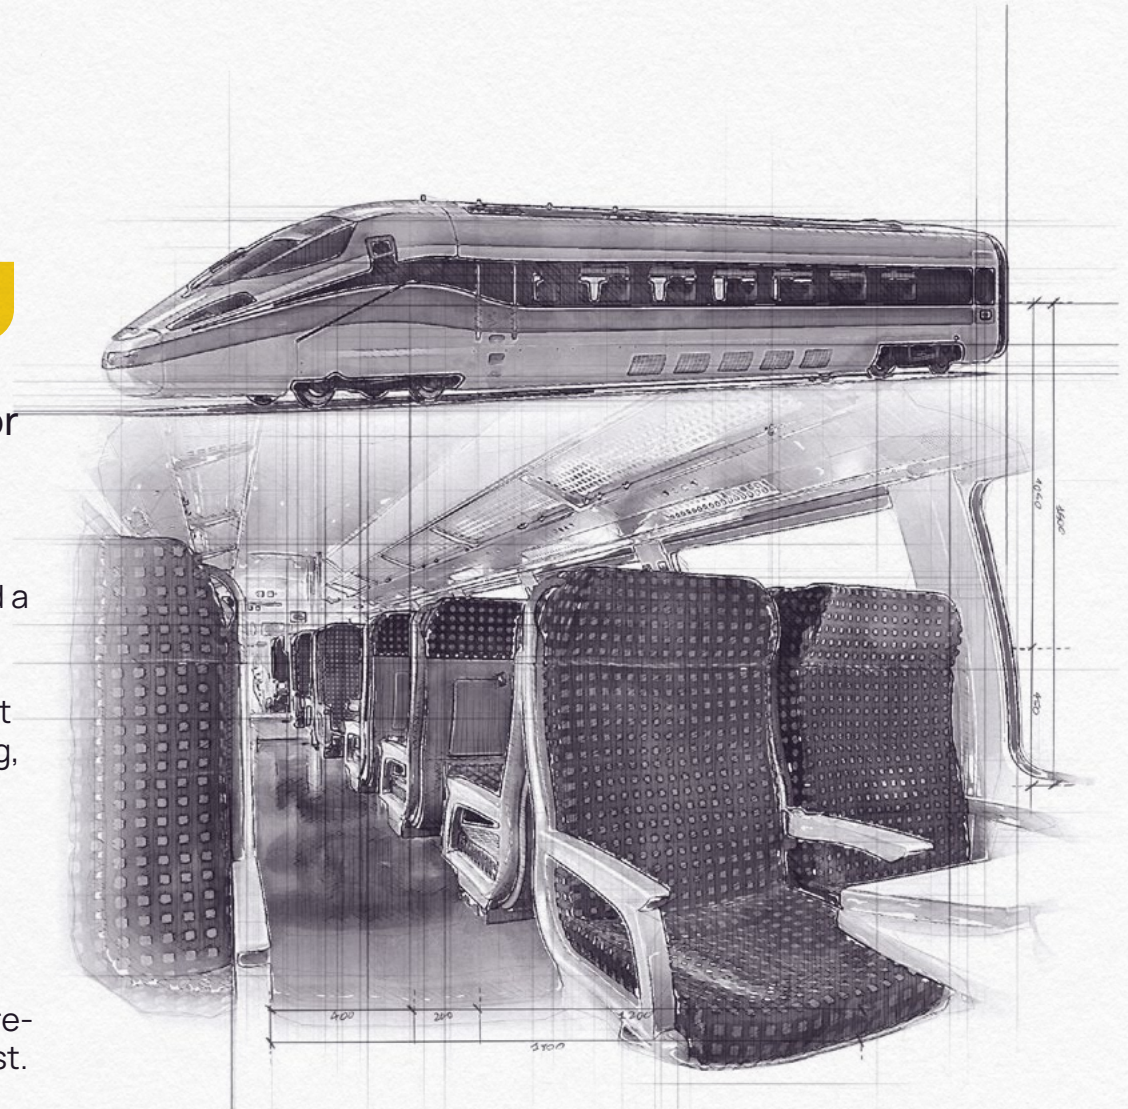

Step inside a full-scale train environment built for immersive storytelling.

This installation brings the energy of a live journey into your event, complete with an arrival platform, boarding tickets, and a fully dressed carriage interior.

Once onboard, guests experience magic moving windows that simulate the journey into London, paired with dynamic lighting, layered sound, and an optional snack trolley service for an authentic in-transit feel. Audio announcements and carriage posters can be fully customised to suit your brand or event narrative.

Designed for high throughput, the experience hosts up to 36 people per hour, with a 45-minute runtime plus a 10-minute pre-journey briefing. Larger-scale versions are available on request.

This is not a set. It's a departure into another world... crafted to surprise, delight, and pull your audience straight into the story.

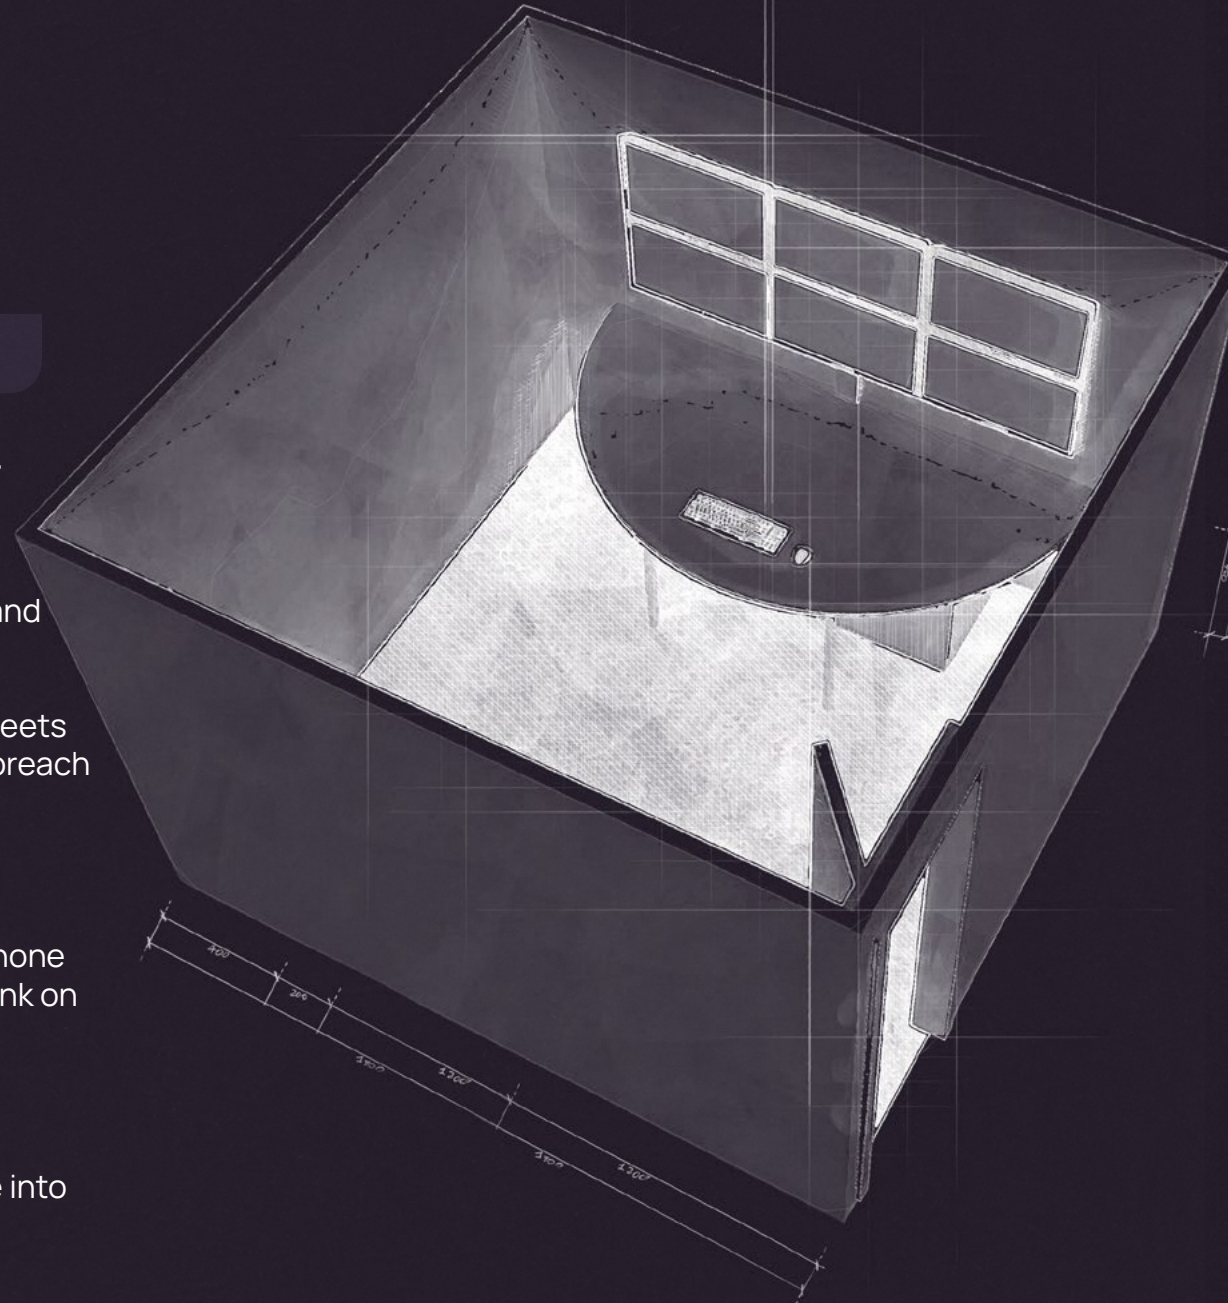

SOC STAR

A fully immersive SOC environment where your team becomes the headline act.

Before the experience begins, players must break into the Security Operations Centre itself using a puzzle located outside the room. Once inside, they face multiple screens, none connected to the keyboard they expect, forcing them to think on their feet as the breach unfolds around them.

Ideal for leadership offsites, culture campaigns, and events looking to go beyond “training” into something genuinely experiential, SOC Star brings intensity, humour, and theatre into a single unforgettable moment.

INSTALLATION

HOLD THE PHONE

_PLAYERS: 4, 1 PER BOOTH _SPACE: 1M X 1M _TIME: 5 - 10 MINUTES

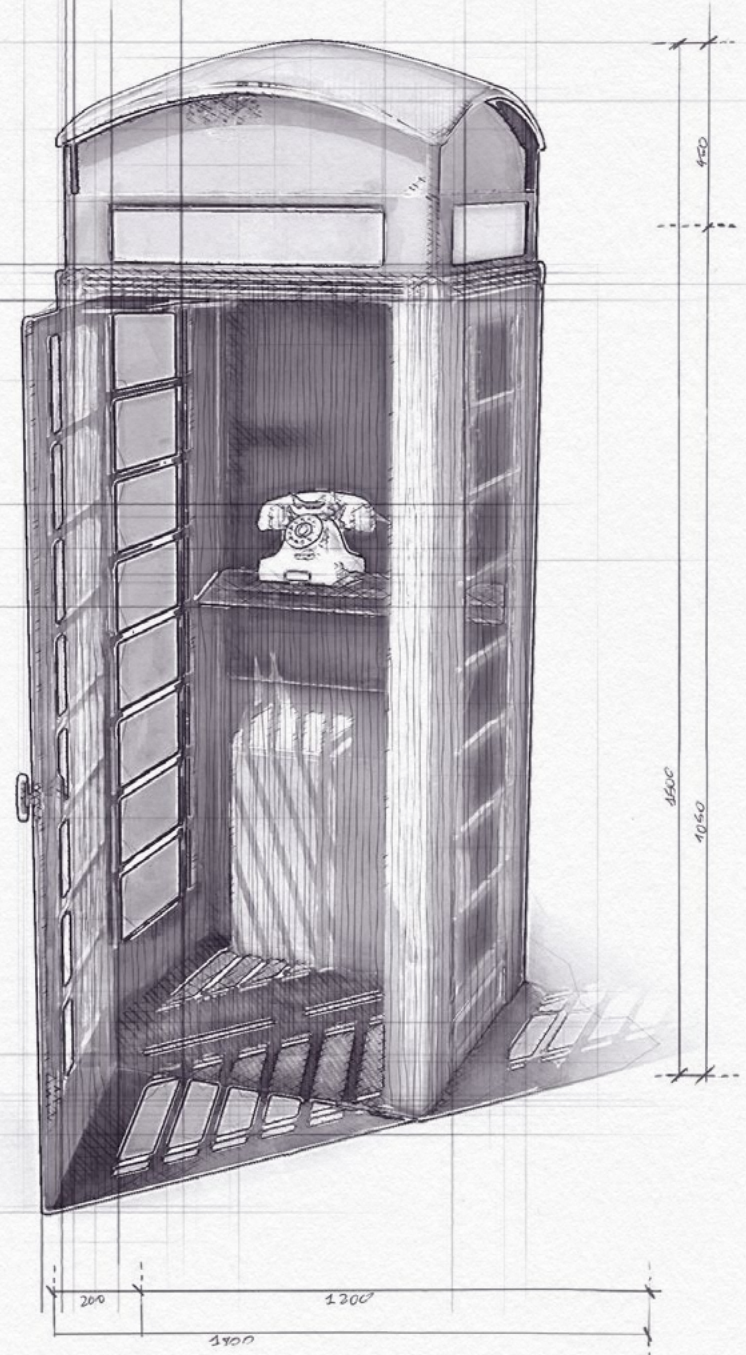

Step into the phone booth.
Pick up the handset.
Face the attacker.

Our custom-built phone booths replicate the classic British red phone box – except ours are yellow and wired straight into CTRL+Vish, our AI-powered vishing simulator.

Inside each booth sits a retro-style phone. No apps. No script. No prep. Just you and the attacker on the other end of the line.

Sessions take 5-10 minutes, making them perfect as drop-in conference activations with no booking, no queue management, and high turnover. With four booths running simultaneously, delegates can jump in whenever they feel brave.

Small footprint. Big energy. **Uncomfortably realistic.**

SPACE_

NOT CONTENT. CONTEXT.

SPACE_ is our collection of large-scale, immersive cyber installations designed for conferences, expos, leadership events, and internal culture campaigns, where people don't just learn about security.

SPACE_

WHY IT WORKS

MEMORABLE

People remember what they feel, not what they're told.

HANDS-ON

This isn't training... it's lived experience.

SCALEABLE

High throughput, modular worlds, multi-team formats.

SPARKS CULTURE

When people play together, they talk about it afterwards.

BRAND SAFE FUN

Serious learning delivered playfully.

ENGAGING

People don't observe the experience. They step into it.

WHAT YOU CAN USE SPACE_ FOR:

- _ Conference centrepieces
- _ Expo activations
- _ Leadership off-sites
- _ Internal security culture campaigns
- _ Customer experience events
- _ Product storytelling
- _ Brand launches
- _ Partner events and kick-offs

SPACE_

WE BRING THE WORLD, THE STORY, AND THE PEOPLE WHO MAKE IT RUN.

Your team just turns up.

- _ Full installation build and on-site setup
- _ Custom narrative and branding opportunities
- _ Professional facilitators trained to run the experience
- _ Reset and rerun operations throughout the day
- _ Tailored briefings for leadership or high-stakes groups
- _ Optional integrations with CTRL+Vish or SHIFT
- _ Optional data insights and engagement metrics

CUSTOMISATION OPTIONS

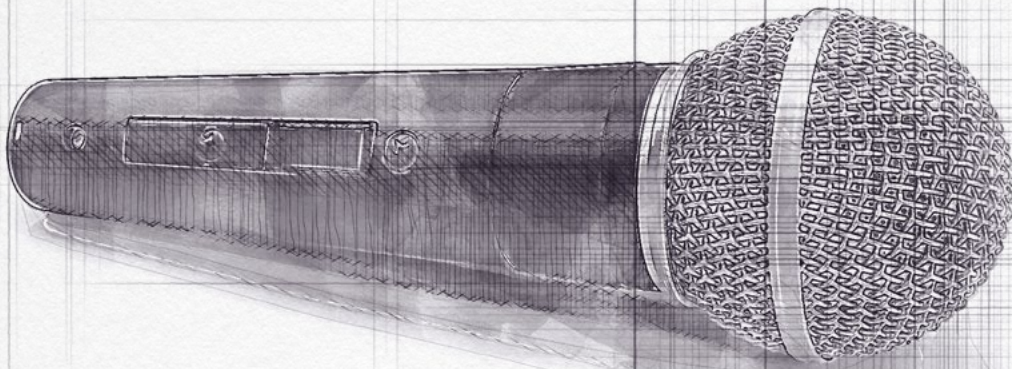

- _ Full branding (visuals, audio, props, messaging)
- _ Industry-specific story worlds (finance, retail, OT, energy, healthcare)
- _ Leadership scripts and storylines
- _ Integration into conference agenda
- _ Modifiable difficulty & runtime
- _ Special missions for exec teams

SPACE_

SPEAKERS BRING THE STORY TO THE STAGE

SPACE_ installations also pair perfectly with live content.

We work with a curated collective of cyber leaders, behavioural scientists, storytellers and sector specialists who can open, close, or deepen your event narrative.

OUR SPEAKERS COVER TOPICS INCLUDING:

- _ Human behaviour and security culture
- _ Real-world breach stories
- _ OT resilience and energy-sector insights
- _ Social engineering & persuasion
- _ Leadership under pressure
- _ Resilience
- _ Incident response decision-making
- _ Sector-specific threat landscapes

SPACE_

A FEW SPEAKERS OUR CLIENTS LOVE

Phil Cracknell

Incident response and security strategy

James Linton

Social engineering, human behaviour and phishing the White House

Amy Stokes-Waters

Security culture, human behaviour and narrative-led learning.

Dane Clackworthy

Resilience, military transition and operational technology.

Ian Murphy

Security culture and comedy sets.

Cecilie Fjelhoy

Romance scams and fraud.

Full speaker profiles available on request

HOW IT WORKS

1 PRE-VISIT SETUP

We work with you in advance to align on narrative, audience, timings and space requirements. We'll request floorplans, access info and any venue H&S policies so everything lands smoothly on the day.

3 BUILD & SAFETY CHECKS

Our team arrives onsite to construct the installations, run safety inspections and ensure all electrical, structural and operational elements meet venue standards. Nothing opens until it's fully signed off.

5 LIVE DELIVERY

Your event runs exactly how you want it: timed sessions, drop-ins or mixed formats. We manage the experiences, reset between rounds, and keep everything running to schedule.

2 SCHEDULE PLANNING

Together, we build a clean running order: arrival time, installation slots, briefings, resets, speaker moments, and traffic flow across the event. Whether you need rapid throughput or structured sessions, we'll tailor the schedule to fit.

4 BRIEFING & OPENING

We prepare your staff, facilitators or delegates with a short briefing — setting expectations, explaining flow and ensuring safe, smooth participation from the start.

6 CLOSE-DOWN

Once your final session wraps, we dismantle the installations, clear the space and complete venue checks, leaving the area exactly as we found it.

SPACE_

READY TO BUILD YOUR WORLD?

Let's design an experience your audience won't forget.
